

Transdisciplinary Prevention Research Centers (TPRC)

The Transdisciplinary Prevention Research Centers (TPRCs) are composed of five research center grants awarded in 2002-2003, that are working on basic science and translational prevention research. The following are the TPRCs currently part of the NNP. More information is available through CRISP, a query system operated by the National Institutes of Health (NIH), at <http://crisp.cit.nih.gov/>.

Mission:

- Bring together multiple disciplines to gain a greater understanding of basic mechanisms and effective new approaches to prevention intervention.
